DETAILED ACTION

Response to Arguments

Applicant's arguments, see page 4, filed 10/26/2007, with respect to the unit of "are" as a unit of area standing for 100 m² have been fully considered and are persuasive. The objection of claim 7 has been withdrawn.

Applicant's arguments filed 10/26/2007 have been fully considered but they are not persuasive. It is prima facie obvious to combine two compositions, each of which is taught by the prior art to be useful for the same purpose, into a new composition (In re Kerkhoven, 205 USPQ 1069 (C.C.P.A.)). In the instant case, both compounds are herbicides used for the same purpose, on a paddy field. As noted this is especially applicable where in the agrochemical art where combining herbicides is well known in decreasing the factor of resistance in essential crops, such as rice.

In response to applicant's argument that in that one of ordinary skill in the agrochemical art would not be motivated to test the combination of the particular compounds A and B from among numerous kinds of base compound, the fact that applicant has recognized another advantage which would flow naturally from following the suggestion of the prior art cannot be the basis for patentability when the differences would otherwise be obvious. See *Ex parte Obiaya*, 227 USPQ 58, 60 (Bd. Pat. App. & Inter. 1985).
